Employment History

2019 – 2019 **Yandex,** intern in Yandex Video.
Develop api for converting some external descriptions of video to internal descriptions of video. Experience from this job also includes some system administrating experience(moving services from on-premises to cloud, solving some infrastructure problems and so on).

2020 – 2021 **Ozon,** Researcher + C# Developer in Ozon.
At this job I mostly had RnD experience(implemented new spellchecker, help with suggestion system and some NLP models for OZON). I've assisted with implementing new cache solutions to some services. Have made some new features in product search of OZON(for example add some new indices).

2021 – · · · · **Yandex,** 16 grade Python/C++ Developer in Corporative Yandex.Go.
At my current job I develop services for new corporative businesses of Yandex such as Yandex.Eats(for example made some new types of food systems, such as vending or in-place in restaurants), Deli, Yandex.Go(for example penalties to corp clients for not paying in time). Moreover, i make some new architecture solutions(for example divided a monolith into new microservices), implement some new features for big corp clients(such as time restrictions and qr pay at vending machines), develop some infrastructure solutions for Yandex(It's NDA), also had some mentoring experience.

Education
